

# IIA international conference 2025

*FROM MY POINT OF VIEW*

# Outline

- Keynote speaker
- Keytakeaways from joined sessions
  - AI opportunities in auditing
  - Limitations of AI in auditing
  - Skillsets

# Keynote Speaker

## Zack Kass

- Zack Kass is an AI Futurist, keynote speaker, consultant, and the former Head of GTM for OpenAI.
- translating complex AI capabilities into practical, adaptable solutions for real-world challenges

# AI opportunities in auditing (1/2)

- In terms of 'Enhancing'
  - summarization and extraction
  - enabling the large volume of data processing
  - fraud / anomaly / trend detection
  - flagging outliers or inconsistencies of potential fraud or misstatements
  - Continuously learns from historical audit findings to improve detection

# AI opportunities in auditing (2/2)

- In terms of “new opportunities”
  - Automates parts of reporting and documentation processes
  - Generative content eg. creating audit program
  - Compliance with regulatory and standards

# Limitations of AI Models

- Data qualities & availability
- Contextual Blindness
- Bias and Training Flaws
- High Cost and Complexity
- Compliance Risks eg. Privacy & Security risks

# Future-ready skillsets

- Digital & Data Analytics Skills
- Critical thinking & Business Acumen
- Human centric skills
- Continuous learning
  - auditors must understand AI risks, related controls etc.

***“The future is not AI vs IA,  
but AI-enhanced IA”***
